Specification

Product Description:

Multi-Polyflora Honey is a naturally sourced, nutrient-rich bee product derived from the nectar of a diverse variety of wildflowers and medicinal plants. Harvested from pristine, biodiverse regions, this multifloral honey offers a broad spectrum of bioactive compounds, including natural antioxidants, enzymes, flavonoids, and trace minerals.

Its complex floral origin contributes to enhanced therapeutic properties, making it suitable for use in dietary supplements and pharmaceutical formulations. Multi-Polyflora Honey supports immune modulation, digestive health, wound healing, and antioxidant defence. Its antimicrobial and anti-inflammatory characteristics make it a functional ingredient in both oral and topical applications.

This honey is minimally processed to preserve its enzymatic activity and natural potency, ensuring high bioavailability of its active constituents.

Application:

- Nutraceutical formulations (syrups, lozenges, tonics)
- Functional foods and beverages
- Topical preparations (ointments, gels)
- Immune and digestive health supplements

Storage:

Please keep it at the temperature not more than +25° C

Packing:

295 kg Drum
